

The Threefold Fruit of Power

When the spiritual genius has ripened in clarity, compassion, and nonconceptual wisdom, the power she embodies does not remain abstract. It flowers into **fruition**—the lived expression of her mastery across worlds, states, and dimensions of being.

This fruition is **threefold**, each aspect revealing how vast her realization has become.

1. She Abides in the Sublime Stations

She lives continuously in **incomparable, magnificent, holy, and divine states of being**.

These are not fleeting moods or meditative highs—they are stable abodes of consciousness, luminous and unshakable. In these stations:

- equanimity is deep,
- joy is spacious,
- presence is effortless,
- and the mind remains untouched by the turbulence of birth and death.

These states are sublime not because they lift her away from the world, but because they allow her to meet the world without being influenced by its distortions.

2. She Moves Freely Across Universes

At the same time, she can **visit any universe, any world-system, any realm of existence without obstruction**. Her mind, freed from the limits of selfhood, moves like light—swift, unbound, and precise.

She travels not as an escape or as display, but **as service**:

- to find beings where they dwell,
- to meet them in their conditions,
- to speak to them in forms they can understand.

She does not bring beings up to her world;
she goes down into theirs—again and again.

3. She Worships the Awakened Ones and Perfects Beings

Wherever she goes, she **honors the awakened ones**—not out of devotion alone, but out of reverence for the truth they embody. Her worship is recognition: the meeting of wisdom with wisdom.

And through her presence,
through the clarity she emanates,
through the skillful means she employs,

she leads beings toward perfection.

Beings who encounter her—whether in coarse realms or subtle ones—are purified, uplifted, awakened to their hidden potential. She becomes the catalyst for their evolution, the force that brings dormant virtues into bloom.

In these three fruits—
her abiding in the **sublime**,
her unobstructed movement across universes,
and her purification of all who meet her—
the power of the spiritual genius becomes complete.

It is the power of one who does not keep her awakening for herself,
but uses it as a bridge for others to cross.
